A DESPERATE Democratic scheme has come to light. The plan is to have pusters with the Cleveland electors ready and paste them on Republican tickets, over the regular Harrison electors. These fraudulent pasters are already in the hands of their workers throughout the country, but the scheme is being duly exposed, and can do no harm.

While you are voting the rest of the Republican ticket do not forget the last name upon it that of Josse Bendurethe candidate for coroner. He served once before in that capacity, and attended to the office well. He is an unexceptionable man in every respect, and he deserves to be elected, independent of the question of politics.

The Second Break in the Cornwall Canal

MONTREAL Can., Oct. 31.—The new landslide on the Cornwall canal on Saturday, will cause heavy loss, shippers having built on the promise that the old break would be completed so that grainladen vessels could deliver their cargoes by yesterday. A gentleman acquainted with such matters, who has just returned from the break, says the work is being conducted in slipshod fashion, and is further back than it was a week ago, which, together with the new break, practically means the close of island navigation for this season. A million bushels of grain, which had been kept waiting for repairs, must now come down ler rail, at an added cost of four cents per bushel. Besides this, several large fac fories on the causi using water power Lave had to shut do in, causing much distress among working people.

A Sweeping Cut in Wages. Chicago, Oct. 3).—The following is printed to-day: General surprise was caused among the Atchison, Topeka & Santa Fe employes yesterday by the an-nouncement that an order had been re-ceived to notify all salaried men on this line that their wages would be reduced ten per cent, beginning Thursday, November I. The only exception to this general reduction of salaries was in the case of those employes, such as engi-I nears and firemen, who belonged to organized bodies or unions. This class was exempt from the reduction, the reason being, it is said, that it was not thought advisable to court a strike. It is reported that this cut extends on every branch of the line to the Pacific coast.

BLAINE AT ALBANY.

The Maine | Statesman Makes a Powerful Appeal for Home Protection.

And Throws the Responsibility for Victory or Defeat Upon the New York Republicans.

ALBANY, N. Y., Oct. 31 .- Mr. Blaine addressed an immense meeting at the Fair Ground, midway between this city and Troy, yesterday afternoon. He was pale, and evidently has not recovered from his recent illness, but spoke distinctly and

investigate the circumstances connected wight the mailing and delivery of the new famous "Minchison" letter. He says the department has taken no action in the matter, and it is not probable thatit will. There are several postal stations in Los Angeles, Cal., and it would be almost impossible to discover the person who called and received Lord Sackville's reply.

A Man-of-War To Be Sent to Hayti. Washington, Oct. 31.—The Secretary of State has requested the Navy Department to send a man-of-war to Hayti to protect American interests there, which on Tuesday next, rain or shine, good roads of from an American, but from an Englishman. If it were lawful in the accient Romans to learn from an elemy, it is certainly lawful in these modern times to learn from a commercial rival. I hold in my hand a clipping from a recent issue of the London Norming Post, a wellknown and prominent newspaper in England, the organ of the late Lord Palmerston, an in Minister Brugg saying that J. B. Law-rence, an American citizen, who has been confined in prison at Silao, Mexico, on a charge of train robbery upon the lieve all that is said against the doctrine of protection, and I am sure I can instruct you no more pleasantly than to sak my friend from Rrosklyn, Mr. Tenney, to read from an editorial which I shall hand him from the Merning

The editorial was as follows:

upon our working onases, who teel every day
more and more the pinch of foreign competition, it would be neededly amusing to note
how completely every one of the principles assumed by the one-sided free-trade school of
this country is negatived by facts and faisified
by the experience of commonplace business
men. We are constantly told that protection
raises the cost of commodities; that a headile raises the cost of commodities; that a hostile tariff-as Mr. John Bright said but a few days tariff—as Mr. John Bright said but a few days back in a published letter to one of his corre-spondents—is only a tax which the community purs to support the particular industry bene-fited by it. As a matter of fact, what do we find is America? Why their manufacturers can actually beat us out of the field on the can actually beat us out of the field on the score of mere cheapness only. So far from protection enhancing the cost of their goods, they can turn them out at rates with which we, with all our free trade, can not manage to compete. The Yale-tock makers can afford to pay the enringe of their goods to England, and yet underseit the Wolverhamton masters in the heart of the lock trade, just as the Belgians can quote lower rates for angle iron delivered in Derby than the local iron masters of the midlands. The Philadelphia locemotive as any English firm and ship it all the way to New Zealand for six hundred pounds for the Philadelphia Life that the Philadelphia Life that the Philadelphia Life that the Philadelphia Life and Life that the Philadelphia and ship it all the way to New Zealand for six hundred pounds are the Philadelphia tenders. In South English tenders less than the English tenders. In South Russia the agricultural trade is said to be passing into he hands of American exporters, in spite o English and Gorman competitors, though the latter are pearer by three thousand miles to the local markets. With the exception of made-up and not because the duty on stuffs is so heavy and not obscause the duty of some is so heavy, there is not a single manufactured article produced in the United States, from carpets to coston, from locumetries to steel axos, from argicultural implements to enthery and "Yankee notions"—as many little domestic appliances are called—which is not as cheep, or was cheep, there there then in this country." even obeaper there than in this country.

Mr. Blaine resumed: That is a most effectual contradiction to the to the state of the train of the state of the state of the United States are ground down by high prices. It is not so, and at last we got an English witness to admit it; and I say here, there is not one article in the United States to the the state of the states to the state of the state of the states to the states of the state of the states o day that is not far cheaper than it was when day that is not far cheaper than it was when protection was applied to it—not one; and the argument that is now closing between protection and free traile is the argument which I took pleasure in snying, in the first speech I made in the campaign, is not for capital; it is for labor; it is not one for the rich man; it is one for the wage-earner, and if it is lost, it is

wages goes into effect next Thursday. It will among the six and a quarter per cent. About twelve thousand cokers in the Councilsville region will be benefited by the advance in wages.

The Louisiana Miser Taken Rome.

New York, Oct. 31.—Patrick Skelly, the old man from Louisiana who was found helpless in Park Rowrecently with about S16,000 in his pockets, left the pavilior for the Insane at Bellevue this moraing. His brother, who had come on from the wille's on the lith, and that it should have bees published in New York at an Irish meeting it Madson Square on the 25th of October. Well, the letter had been published four days, and Lord Backgille had admitted it, and Mr. Bayard had these times criticized by saying that it was a private affair and none of his business, and after it had become, in the language of the boy of to-day, a "chestnut," I referred to it in public meeting; and now Mr. Collins says that it is the most remarkable conspiracy of modern times. (Applause and laughter, Any thing to get that off their shoulders. It is bothering them. No Republican Administration ever had the intervention of the British Minister, and never will. No advocate of protection in this country had the sympathy of the British Minister, and never will. The American doctrine of protection, upheld by the Recan doctrine of protection, upheld by the Republican party, finds no support at the hand of Englishmen or English ministers, and wha we want to contend for is that self-respect the first law of nations, as at is of men, and that while England would resent to the last degree out intervention in her depression. gree any intervention in her domestic affair by an American Minister, so should we resen by a American minister, so should we resent the least intervention in our domestic affair by a British Minister. As long as he is: British Minister he is entitled to the entire respect of the whole American people Diplomatic respect is the first law oall intercourse between nations. He a

claims as to Illinois and Cook county are as empty and false as the claim that they will carry any certain Republican State. The Republican National and State candidates will have in Illinois 25,000 majority outside of Cook county, and half as much more, at least, inside of Cook county. Instead of Palmer running ahead of his ticket in the city or in the country, he will run behind it. His per-nicious appeals to had passions, to the enemies of peace and social order to all the elements of discontent and turbu-lence, and his open alliance, through the Democratio candidate for State Treasurer, with the Anarchists and extreme Socialists, will cause him to lose the sup port of thousands of Democratic voters, as it has already caused him to lose their confidence and respect. # "HOME COMFORT" FURNACES.

Wrought Steel, Malleable Iron, Very Little Fuel, No Leaky Joints.

No one can say that the time was not ripe to: a new furnace. The days of brittle, porous, cast iron furnaces are numbered. In every branch of manufacture cast iron is being driven out by wrought iron and steel Every bridge that goes down in a wreck of lives and property is found to have cast iron members. Every burstin, cannon which slays its friends rather than its enemies is made of east iron. Every leaky furnace which poisons a household with its noisome gases is found to be made of the same cheap, unreliable material. Improved methods of manufacture have made steel and iron plate, of first quality, less expensive than cast iron formerly was, and it is plainly in accord with progress in other directions that there should be progress both in design and the material of furnaces for warming our homes, churches and schools.
